Company Details :-

Sankey Solutions have been founded in 2015 with 4 people and now we are 200 + rapidly growing. We are working for many fortune 500 companies. The reason for rapid growth is our customer centric approach & solution mindset. Recently, we have been awarded as a 7th fastest growing company in India and 51st fastest growing company in APAC region. We work on all different domains since we are generalist services company. Thane is our innovation and delivery center in India and we have offices in UK, Singapore and now we are developing business in Europe.

Company website :- www.sankeysolutions.com

Following are the details for the recruitment drive. Please do communicate with students about it. Request you to ask all the students to get well prepared with job description, required skills set and to go through the company profile.

SAMPLE INTERVIEW PROCESS:

Round 1: Logic Test: You will be assessed on Logical reasoning , Input and Output based Programming skills and Sankey Fit HR Screening questions in Multiple Choice Question (MCQ) format

Round 2: Technical Round: You will be asked conceptual and detail questions about any programming language that you are familiar with. For example: what are pseudo classes in CSS, what are relational and non-relational databases etc.

Kindly acknowledge the email and confirm.

Let me know, in case of any queries.

Regards,

Raviuday Sangaonkar
IT HR Executive
